Anna,

We met this past winter at the EPA Region 3 Trash Summit and I just wanted to follow-up about the Alice Ferguson Foundation's upcoming trash summit (see attached flyer)! This year's event is scheduled for October 16th at George Mason University in Arlington VA and will be themed around Business Solutions for Plastic Pollution.

There is strong interest in having a roundtable discussion at the summit on the future of the trash TMDL. I have been in touch with EPA and DOEE about this, but would love to get your feedback as well.

Is there a time this week or next that we can chat over the phone?

Laura
